

Planning Engineer for Dam Project

Position Title: Planning Engineer

Location: Jomori, Samdrupjongkhar

Reports to: Project Manager

Duration: Full Project Duration

Roles and Responsibilities:

The Planning Engineer will develop, manage, and monitor the project schedule and ensure that all tasks are completed on time. They will collaborate with various teams to ensure proper resource allocation and coordination.

Skills and Expertise Required:

- **Project Scheduling:** Expertise in developing project schedules, work breakdown structures (WBS), and detailed activity planning. Proficient in using project management software.
- **Critical Path Method (CPM):** Strong understanding of CPM analysis to monitor project progress and identify delays or potential risks to project milestones.
- **Resource Allocation:** Proficient in resource planning and management, ensuring optimal use of labour, equipment, and materials.
- **Cost and Budget Management:** Experience in tracking costs and adjusting schedules based on budget constraints or financial changes.
- **Reporting and Analysis:** Ability to provide clear, detailed, and accurate reports on project progress, delays, and potential risks to senior management.
- **Communication and Coordination:** Strong interpersonal and communication skills to work with engineers, contractors, and other departments.
- **Time Management:** Highly organized, with a proven ability to manage multiple tasks simultaneously and meet deadlines.
- **Risk Management:** Ability to identify risks related to scheduling and offer mitigation strategies.
- **Adaptability:** Ability to adapt plans based on project changes, delays, or unforeseen challenges.

Qualifications:

- Minimum Bachelor's degree in Civil Engineering, Construction Management, or a related field.
- At least 5-7 years of experience in planning large-scale infrastructure projects (hydropower projects preferred).

Compensation:

- Salary: Nu 1,00,000 to Nu 1,50,000 (Negotiable)
- Additional Benefits: Food and lodging provided.
